Win prizes and learn about Android's modern UI toolkit, Jetpack Compose

If you want to improve SQL skills, then install a SQL package like MySQL and start practicing with it. To get you started, we've outlined a few SQL query questions in this post.

Solving practice questions is the fastest way to learn any subject. That's why we've selected a set of <u>50 SQL queries</u> that you can use to step up your learning. We've also given <u>SQL</u> <u>scripts to create the test data</u>. So, you can use them to create a test database and tables.

If the SQL query questions we've filtered out of interviews held by top IT MNC like t and Amazon. So you'll gain real-time experience by going through them.

ve recommend that you first try to form queries by yourself rather than just reading them ne post. Try to find answers on your own.

u can't start until the required sample data is not in place. You can check out the tables that we've provided for practice. So first of all, you need to create the test data in your use software.

way, we have a bunch of other posts available for SQL interview preparation. So if you erested, then follow the link given below.
